

# FOODSHARE DELIVERIES

Please empty food you are delivering into crates as follows:

## 1. STATISTICS

Count the number of full crates when you arrive, and enter on the chart

## 2. GETTING STARTED

Layout five crates as shown, and fill them to just under the metal bar.

## 3. STACKING CRATES

Fold the metal bar over, to allow you to stack another crate on top, without it crushing the food in the lower crate

## 4. SECOND LEVEL

Stack a second layer, then fill the crates with food to just below the metal bar.

## 5. MAXIMUM HEIGHT

Stack crates to a maximum of four layers high.

## 6. FINAL LAYERS

Then place another layer of crates in front of the back three, fill them, and stack to a maximum height of 4 crates.

## 7. STATISTICS

Count the number of full crates after you have finished, and update the chart.
